Friday's Sitting.

Monday, Feb. 22, 1867. Council mot at 1 p. m. Present—Hons Crease, Hamly, Brew, Ball, Smith, Barnard, Robson, Young, Macdonald, Walkem, Stamp Helmcken, DeCosmos, Southgate, Pemberton Cox, Sanders, O'Reilly and Trutch.

TRADES LICENSE BILL. On motion of Hon Crease this bill was postponed one week, so as to come up after the report of committee of supply.

VICTORIA INCORPORATION BILL Hon Crease moved second reading of this bill, which was only the old Act with such amendments as would make it workable. Hon members were familiar with the various the failures that impeded its progress. The chief difficulty was that the Corporation lack ed the clearly defined means of enforcing their municipal taxes. The principle was

the same as the old one.

Hon Macdonald asked that the second reading be postponed, as the bill had not been printed. Postponed for one week.

MECHANICS LIEN BILL.

Hon Robson moved the first reading of the Mechanics Lien Bill, chief provisions of which were to give to persons form shing labour or material for repairing or building ships, a lien for their wages, process being by attachment; also for labour or material for erecting, altering and repairing buildings, precaution being taken against a lien for too arge a sum.

The bill was read first time, hon Crease

remarking that the principles enunciated by the hon member were the strongest reasons for its condemnation.

THE TARIFF. Hon Helmcken moved the appointment of a committee to revise the Tariff. He was not a committee to revise the Tariff. He was not prepared to assume the personal responsibility, and he did this with a view to relieving the Executive (hear, hear). The tariff required alteration, and he believed it could be so framed as to protect home industry and encourage the trade of Puget Sound, which was of real value to the colony cher, hear). policy, and that must be continued. We cannot mix free trade and tariff together. When a policy is established, particularly as to promoting agriculture and home industry it might draw pany people who would not otherwise come to the colony.

Hon Robson seconded the motion, though

he was at a loss to understand the course pursued, since be had himself proposed a measure in a different way. The sooner, however, the tariff was attended to the better. In his own district there were many mer watching it with anxiety, ready to go on at extended scale into industrial pursuits. The same could probably be said of the Island districts. Nothing, barring the Estimates, was of greater importance than attending to our agricultural and industrial interests. Hon Helmcken in explanation said he had

enquired if the Government intended bring in such a measure, and was answered in the negative, being told at the same time that the appointment of a Committee would be a relief to the Government.

Hon Pemberton sustained the hon member

for New Westminster. He knew on the Island that parties were ready to break up and leave the country if their interests were not protected so as to give them some inducement to remain in the country, and he would remark that although we were snowed up here others enjoyed a milder climate (laughter.)

The motion was agreed to, and the President agreement of the president agreement of the president agreement of the president agreement.

dent appointed the following Committee; Hons Hamly, Brew, Ball, Robson, Helmschen, DeCosmos, Smith.

Hon Pemberton's motion for returns of amount of fines and seizures in the Custom Department, from '60 to '66, inclusive, stating how appropriated, was assented to.

COMMITTEE OF SUPPLY
Council went into Committee on the Estimates, Hon O'Reilly in the chair.
Hon Birch wished to state' in answer to enquiries made at the previous sitring, that it was the intention of the Government to amalgamate the office of Treasurer with that of Collector of Customs or some other office; but they had no power to act until reference had been made to the home author ities; with that view he had put "if required" in the Estimates. Mr Watson would act in Vancouver Island until the Act was repealed. he could afford no further information until they heard from home.

Treasurer \$5020. Hon Walkem said, hon members would have much difficulty in dealing with this department with the office of Treasurer in suspense, and he would advise, as the office Treasurer was vacant, that every possible reduction be made in the office, in the meantime, however, as the promise of the Colonial Secretary might be taken as a guarantee of amalgamation, the offices might be

Hon Ball said this was a Crown Colony and hon members must bear in mird that there was a good deal of red tape required in the system, the estimates, he believed were frarred with economy. The clerks in the service were always employed and if idle would be discharged; he did not see that they could be reduced.

its own affairs. In England the taxation was equivalent to \$10 a head. If the population of Canada was three million it would not exceed \$3 50. In New Brunswick it was ceed \$3 50. In New Brunswick it was about \$3 10 with a population of from two to three hundred thousand. In Nova Scotia it was about \$2 50 or \$3, yet this colony was called upon to pay \$1 00. He would admit that so long as they were called upon to support the form of Government here, the tax must be high, but not unnecessarily light. In pieneer communities, if we get the Government to preserve our property and land, it is really all we require. Here we have a said in the next territory about what was said in the next territory about the people being serls. It has been through such ridiculous statements and newspaper articles that the credit of the country has been destroyed abroad. He was in hope, when everything had been brought to wreck and ruin in the late Colony these gentlemen would come back to us wiser if not better two clerks dispensed with, which would be a saving of \$2440 Perhaps they would be told of the aertage surveyed, although Argus said the really all we require. Here we have a same ideas that promulgated there. He [Mr] be so framed as to protect home industry and encourage the trade of Puget Sound, which was of real value to the colony (hear, hear). To revise the tariff to a great extent was not his intention; it was high enough in the main and to increase it on many articles would be a loss to the colony and only encourage smuggling. The Council generally could be of only one opinion if the tariff was to be carried to a legitimate extent and 50 further. It a system was to be followed there must be a policy, and that must be continued. W. stru k off. Never was such a mistake, The number of Indians from the Island to the Rocky Mountains might be estimated at The number of Indians from the Island to the Rocky Mountains might be estimated at a maximum of 18 000 (he obtained his facts from an experienced authority, who got it by regular census.) They were only worth anything to the Colony to the extent of the furs they sold, the 60,000 gallons of oil they warmth and emotion to the gratuitous produce, and the fish and game they supply; beyond that, and the small amount of labor they contribute, say 250 on an average, what was the value of the balance? Little or none. Deduct what the Indians produce and they are not to be considered tax-payers. They ought, in fact, to be regarded merely as so many horses or mules. Take away the white man and what would the Indian produce? Examine closely into the matter. To turn

Then the Collector's office, what have they to do? Nothing; a little splurge size a Crease, and the total passed less the week on the arrival of a steamer, and it is over; busy one day doing nothing six; glaring instance of extravagance. The office had been said; the Government were de-termined to push the estimates through, and so on would prevent such a thing, but the people will first appeal to Her Majesty's Government, and if justice is not done, the consequences will be serious. It was not until blood was spilt in Australia that excessive taxation was done away with. There the Government thought they could seize upon a man, and if he did not pay their exorbitant demands, they could cram him in prison. Here a similar process of wringing money from the pockets of the people was being carried out.

Hon Pemberton hoped the representative members would go to the Executive, and if to no redress were obtained, petition the Crown. Hon Birch said he had heard a good dead from the hon Victoria member about rebel-lion, but ho hat himself been through the Colony, and must say, he never heard it mentioned until within this Council Chamber. Hon Walkem thought that apart from all local jealousies the office ought to be taken to Victoria, where there were two banks and where all the gold went.

Hon DeCosmos considered it a pity the amount was ever put into the Estimates, when it was known to be a losing concern. Compensation was a mistake. the advantages it offered.

Hon Young explained the origin of the office, which was established on petition from Victoria, but having been paid for by British Columbia was placed here.

Hon Helmcken said it was better to abolish it altogether, as private enterprise could do the work as well, perhaps cheaper. The principle on which free assays were made was that the p rties had to discloze where their specimens were obtained, and sooner than do that, in many cases they preferred giving them to private assayers or sending them to San Francisco. The department, moreover, was incomplete without a crashing machine. Hon Birch objected to such a proceduce, the clerks were necessary, how could the banks manage without clerks to do their business, or the H B Co?

Hon Helmeken—The Company does are business than the Government of at Victoria, it would be both advantageous and fine conditions. Examine closely into the matter. To turn the bone and sinew of the country to account was all very well, but we could not do so. Even include 2,000 Indians in the estimates, and we are then taxed \$70 per head, seven times more than in England, with her national debt. on her shoulders. Was the value of labor here worth seven times as much? The bon gentleman made a great mistake, and could not by any course of reasoning justify it. What had the lands and works department done for their money? the whole duties might be performed by adding a draughtsman to the Colonial Secretary's office. If used as an engine for emigration, then it would be turned to proper account.

couragement to those who live upon water as well as upon land, we must course. The Executive will find it work economically, a landing waiter being all that was necessary, and the trade of the Colony would be preserved. He, therefore, moved that it is the opinion of this Council that the

Custom House should be at Victoria, and the revenue officer at Victoria be struck out. Hon Birch said this was a question of voting an amount for the requirements of the Customs Department. This was not the time for him to say whether he agreed with the views of the hon member, as the matter would come up hereafter.

Hon Hamly said that the vote would only be temporary, as changes were contemplated in his department. The Governor was aware of all the circumstances that could be made as to the position of the chief office. He should probably be at Victoria himself most of the year. As regarded the officers, he would state that he had made the lowest estimate what the department required; they all ha their hands pretty full and he did not ask for one extra on account of the additional labors imposed by Union. They would all find ample employment during the year. Hon, Robson could not understand the

policy of foreign shirs being prohibited from proceeding farther than Viotoria; the hon-member for Viotoria could soarcely expect to carry that out Were not foreign ships to go to Nanaimo? No doubt it would suit the hon. member very well that the coal should be conveyed to Victoria—perhaps in Hudson Bay Co.'s ships—and then shipped. It must be a liberal mind indeed that would preven foreign ships going to Nanaimo for cargoes of coal, the chief export, except timber, from Burrard Inlet. He (Dr. H.) would like no doubt to build up a direct trade and make Victoria the emporium of commerce in the Colony [hear] but commerce ought to be facilitated instead of restricted, and he hoped

no narrow minded restrictive policy would be adopted, but a liberal ore.

Hon Helmcken asked if liberality consisted in giving away what did not belong to us.
The hon member eviden'ly did not understand The non memoer evidently and not understand the subject, and was not aware that foreign ships might proceed to ary port beyond the nort of entry to load, but could not coast, but with the present system it was no expense, but with the present system it would be a waste of money to have more than one dutiable port. As for its doing New Westminster have high there was no more trade done here harm, if there was no more trade done here than he had seen since he came, it could not do the place much harm; the only loss would be the removal of the office. The country could not afford to pay for the convenience of

three or four ships.

The hon gentleman withdrew his motion as the request of the President, on the under-standing that the subject was to come up

again.

Hon Macdonald could not understand what
the work could possibly be to employ so large a staff and he therefore moved that one clerk be struck out, with the officer at Burrard Inle

be struck out, with the omeer at Burrard thee and messenger.

Hon Birch suggested that the revenue officer at Victoria be made provisional and temporary and the Council might take his word that the office should be dispensed with it possible. Hon Southgate suggested that the word 'Victoria" be struck out. Hon Hamley—It was put there by mistake. Hon Helmcken—But a very disgraceful

nistake. The word "Victoria" was erased; the item of \$1700 made provisional, and the whole amount, \$11,221 80 passed.

Registrar General, \$2,290-Hon DeCosmos said we had been properly told we had too many generals, and there was no necessity for such an officer in this place, and this was no time to pay large salaries for little or no work. In Vancouver Island, where professional man was required, the work a professional man was required, the work could be done in one or two hours a day, and the rest of the time devoted to professional duties. He proposed to reduce the salary to \$1000, which he considered ample. It was proposed in the last session of the Island legislature, to unite the office with that of Registrar of the Supreme Court. He was in favor of having a Registrar of Deeds, but not in favor of paying him \$1940 for doing little or nothing.

A motion to adjourn till Saturday at 11

a.m., was here carried.

The Mail Subsidy—A Suggestion.

MESSES EDITIORS;—Instead of renewing a futile and expensive experiment to subsidize mail steamer between this place and San rancisco, could not our Government avail itself either of the postal communication now open to Porsland, or of the overland route to Olympia—close to her very doors? I feel sure that if the American authorities were approached in a proper spirit, and on payment of the usual charges on letters, they would take charge of our mail matter at Panama, and sort it at San Francisco for dispatch to Portland. If forwarded to the latter place, we should receive letters twice a-week from the East. If this plan were feasible, it would be less expensive by far than subsidizing a mail steamer, and more dignified than our present dependence on the courtesy of our accommodating neighbors.

How to Replenish the Treasury. Messus Editors:—Having a very great objection to seeing my name in print, it is with delicacy that I approach the present subject: which is to ask the Amateurs for their valuable assistance in behalf of a de-serving and useful institution which in time gone by, has done an immense deal of good to certain persons, and which is now in a dreadfully depleted condition. I allude to the Treasury of British Columbia. As one performance would realize but little towards so great an end, I would suggest that an entertainment might be given every week until further notice. From the well-known character for generosity of our Am-

Her husband was the lightkeeper at Race Rocks. He was sent out by the Home Government -just as the assayers were-and served his country faithfully and well until death cut short his career. He died at his post doing duty. The pay attached to the effice of light-keeper was somewhat smaller than that of the "Master" of the "magnificent territory," and the poor man has not been under the and the poor man has not been under the sod more than three months before we find his widow appealing to public charity to keep her and her babes alive. The facts o the case have been laid before the Governor, and we have looked in vain for a special message recommending some relief for the unfortunate family. While able-bodied men have had their wants attended to, and their passages mid to the rands Mrs Davis is left. sages paid to ther lands, Mrs Davis is left to beg from the citizens of Victoria for the means to keep her from starving. Now, we submit that this is a hard case. If Government can be compelled to look after the wants of one class of officials, it can be made to look after the widows and orphans of its hardest worked, worst paid and most

A FAST HOESE-The Maine Farmer tells a story of a man whom it calls Neverbeat. Somebody having boasted of the speed of his horse, Neverbeat rejoined, " Why, the other day I was up to S--, sixteen miles distant. Just as I started for home a shower came sweeping on. The rain struck in the back part of the wagon, and the moment it struck, I hit old Kate a cut with the whip Away she trotted, scarcely touching her fore feet to the ground; she kept just nip and nip with the shower. The wagon was filled with water, but not a drop fell on me."

A U. S. SOLDIER is now at the American headquarters on the disputed Island of San Juan, on a charge of making a false arrest. A citizen had got 'tight'-as citizens will get sometimes, when he was arrested by the soldier and carried to the guardhouse, as was alleged, by the order of Captain Grey. It turned out, however, that the captain had given no orders of the kind, and the citizen has since exchange places with the "soger

EDUCATION! NEW WESTMINSTER, F-b. 28-In ulfilment of a pledge given by the Governor in the address with which ne had the honor to open the present Logislative session, he now lays be-fore the Council his views on the subect of education at the public exconse. He has to refer to two different sections of the Colony in which the question has been treated in different ways. In Vancouver Island the attempt has been made to make the education of the youth in the Colony a burden on the community. The Governor lays before the Council statements of the present condition of the relations existing between the Government and the public schools of the Island, and leaves the question as to indebtedness on the one side or unreasonable expectations on the other, to be freely dealt with by the Council, one from which the Governor stands aloot. He will merely state that in the opinion of his predecessor the system was not successful, and that other objects besides the intel-lectual advancement of the children of the Colony were sometimes allowed entrance into the consideration of the Board of Education. On the mainland the Governor has been compelled to acknowledge that the population is yet too small and scattered for any regular system of education to be established. Where parents have been willing to pay towards the instruction of their enddren, he has, with the consent of the Legislative Coancil, assisted them from the public The schools have not been under the direction of the Government, and pupils have been led or sent from those that asked assistance from the public to those enjoying the dignity of independence or back again, as the parents might elect. Scrofula, or King's Evil.

Is Constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth, and filthy habits, the depressing vices, and, above all, by the veneral infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, cruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases: consequently, vast numbers perish by disorders which, although not scrofulous in their nature are still rendered fatal by this taint in the system. Most of the consump-

Compound Extract of Sarsaparilia, the most effectual remedy which the medical skill of our times can devise for this every-where prevailing and fatal smalady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as Empritye and Skin Diseases, St. Anthony's Fire, Rose, or Erystepelas, Pimples, Pustles, Blotches, Blains and Boils, Tumois, Tetters, and Salt Rheem, Scald Head, Risgoword, Rheematism, Syphiliptic and Merchall Diseases, Dropsy, Dyspepsia. Debility, and, indeed, all Complains arising from Vitilated or Impurity of the blood. The popular belief in "impurity of the blood," is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions. So wide is the field of its usefulness, and so namerous are the cases of its cures, that almost every section of country abounds in persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every-other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten. forgotten. The immense demand enables the proprietors to reduce the price; it is now sold in bottles 1s 1/2; 25 9d; 4s 6d and 11s.

Dr J. Collis Browne's Chlorodyne—Vice-Chancellor Sir W Page Wood stated publicly in cart that Dr J Collis Browne was undoubtedly the investor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he repretted to say it had been sworn to. See the Times July 30th, 1864.

Dr J. Collis Browne's Chlorodyne—The Righ Housell communicated to the Conce of Physic-lans and J T Davenpot, that he had received information to the effect that the only remedy of any service in Chol-era was Chlorodyne. See Lancer, Fee. 31, 1863.

Dr J Collis Browne's Chlorodyne—Extret from MEDICALTIMES, Jan 12th, 1866—Is prescribed by scores of orthodox medical practioners. Of course it would not be thus singularly popular did it no, supply a want and fill a place.

GRIMAULT'S ISYRUP OF TODIZED HORSH RADISH

The syrup is employed with the greatest success, in place of Cod Liver Oil, to which it is infinitely superior the curse diseases of the chest, scrobula, lymphatic disorders, green stckness, muscular atony and loss of appetite. If regenerates the constitution by parifying the blood, and is, in a word, the most powerful deparative known. It never fattgues the stomach and bowls, and it administered with the greatest efficacy to young children subject to humors or obstruction of the gland. At last, it is very efficacious in the diseases of the skin. 3

GRIMADLT'S"SYRUP OF HYPHOSPHATE OF LIME. This new medicine is a sovereign remedy in phthis ind one diseases of the lungs, promptly removes all the most serious symptoms. The cough is relieved; the night sweats cease, and the patient rapidly recovers health.
